TYPE	Structured chenille with a soft, velvety pile
FOUND ON	Tignes · Vik
STYLE	Glamour, Modern Luxe
PETS	Pet-friendly · snag-resistant

FABRIC PROFILE

Aphrodite 07

MOCHA PET-FRIENDLY

Meet Aphrodite, where softness meets substance.

ABOUT THE FABRIC

A fine, velvety pile covers its thick chenille body, creating a captivating play of light and shadow that gives every sofa real depth. Choose from luminous ivory, soft grey-taupe Rabbit, rich Mocha or earthy olive. Beneath the beauty is serious resilience: pet-proof by design, it's built for years of daily use, holds its colour brilliantly and resists snags, making it a stylish choice for homes shared with cats and dogs.

THE COLOUR

A deep, coffee-toned brown with rich, cocooning warmth. Ideal for an intimate, boutique-hotel feel, especially with gold accents and warm lighting.

KEY FEATURES

01 Soft pile creates a play of light and shadow

02 Thick, substantial body

03 Very high abrasion resistance

04 Excellent colour fastness to light and rubbing

05 Snag-resistant and pet-friendly

06 Oeko-Tex and REACH certified

HOW TO CARE FOR IT

Vacuum regularly
Use a soft brush attachment to keep the pile fresh.

Removable covers
Wash at max 30°C.

Tumble dry low
Low heat only.

Iron max 110°C
Use a low setting.

Dry clean
Professional, without solvents.

DO NOT BLEACH

GOOD TO KNOW

Shading
Pile fabrics catch light differently from each angle — a natural feature, not a flaw.

Pilling
Light fuzzing in the first weeks is normal. Lift it with a fabric shaver.

Colour transfer
Light shades can pick up dye from new denim and dark textiles.

By the numbers

MARTINDALE RUBS*

Light domestic	10k
General domestic	15k
Heavy domestic	25k
Aphrodite	**100k+**

4× the 25,000 recommended for heavy domestic use.

PILLING · 4–5 OF 5

●●●●◐

The higher the grade, the smoother the surface stays.

TESTED TO INDUSTRY STANDARDS

BUILT TO LAST

365 G/M² WEIGHT** **>5** LIGHT FASTNESS **100%** POLYESTER

OEKO-TEX® Standard 100; REACH compliant

*** Martindale rubs** measure wear resistance, where fabrics over 30,000 rubs are officially classified as hard-wearing for high-traffic environments.

**** Fabric weight (g/m²)** reflects thickness and body, ranging from light materials under 200 g/m² to thick, heavy-duty upholstery at 300–450+ g/m² that holds its shape over time.
